

Project Name: 3S Education

URL: <https://www.3seducation.com/>

Platform: Web & Mobile Application

Testing Type: Manual Testing

Test Scope: Functional, UI/UX, Usability, Responsiveness, Regression

Objective: The objective of this testing was to evaluate the functionality, usability, and UI consistency of the 3S Education platform across different modules such as login, courses, quizzes, profile, media content, and payment flow. The aim was to identify functional and UI related issues affecting user experience.

Modules Tested

- Login / Signup / OTP Verification
- Forgot Password
- Home / Dashboard UI
- Courses Section
- Quiz Module
- Profile Management
- Video / PDF Content Access
- Payment Module
- Footer / Contact Links
- Logout Functionality

Test Execution Summary

- Total Test Cases Executed: 18
- Passed Test Cases: 08
- Failed Test Cases: 10
- Bugs Reported: 10

Testing Observations

- UI/UX issues were frequently observed across multiple modules
- Some functional flows were incomplete or not responding
- Cross-device responsiveness issues were identified
- Core features like quizzes, media content, and profile updates require improvement

Conclusion: The 3S Education platform is partially functional with several core features working correctly; however, multiple UI and functional defects were identified that impact user experience. These issues should be addressed to improve usability, responsiveness, and overall system stability before production readiness.
