

Project Name: Columbia Academy (Web & Mobile Application)

Platform: Web & Mobile

Testing Type: Manual Testing

URL: <https://columbia.edu.np/>

Testing Scope: Functional Testing, UI/UX Testing, Regression Testing, API/Flow Validation

Objective : The objective of this testing was to evaluate the overall functionality, usability, and UI consistency of the Columbia Academy platform. The testing focused on core user flows such as login/OTP authentication, course and mock test modules, password management, session handling, admin features, and communication features like Contact Us.

Modules Tested

- Login & OTP Authentication
- Homepage UI & Design Validation
- Mock Test Module
- Password Reset / Change Password Flow
- Session Management
- Contact Us Form
- Footer Links & Navigation
- Logout Functionality
- Admin Panel (Quiz Settings, Negative Marking)
- Cart Functionality
- General UI/UX Consistency

Test Execution Summary

- Total Test Cases Executed: 20
- Passed Test Cases: 11
- Failed Test Cases: 9

Conclusion

The Columbia Academy platform demonstrates partial functional stability with several core features working correctly. However, multiple critical issues were identified in authentication flows, session management, UI consistency, and backend error handling. These issues significantly impact user experience and system reliability and should be addressed before production readiness.
